Soil Science And Management

Synopsis

This revised edition emphasizes two aspects of soils: the science of soils (chemical make-up, biological properties, their place in the ecosystem) and the management of soils. Plaster provides the latest information on soil ecology, soil/water conservation and soil evaluation. Approximately 600 end of chapter review questions, problems and activities are also included for practice in applying basic soil science principles. This book should be of interest to undergraduates on courses in soil science.

Edward Plaster has taught horticulture and soil science for more than 30 years. He belongs to the American Society for Horticultural Science (ASHS) and the Soil and Water Conservation Society (SWCS). A former ASHS Certified Professional Horticulturist, Professor Plaster remains active in several national and local trade organizations, certification and accreditation programs, including the Minnesota Nursery and Landscape Association and Associated Landscape Contractors of America. Professor Emeritus from Dakota County Technical College, Mr. Plaster continues to make professional presentations about soils to various organizations.

When I was looking for this book I was under the impression that this was #5. I would not have purchased this book if I had known it was #2. It was not marked correctly on the page that I bought it from. I am a student with very limited income and was forced to drop the class because I didn't

recieve the correct book and ordering another one would have been to late for my studies. I have bookmarked where I bought this book from and will not buy from there again.
