My children's school uses this curriculum so I'm grateful that I was able to buy a copy for home. I am able to see what they are learning and help them without confusing them because it's the same book.

love these books

Thank you!

Great recommended, great seller!

On time and as expected

We are huge fans of this curriculum. Goes right along with the public school common core math, yet makes it very simple and easy for the homeschool parent to understand and explain.

Math workbook with chapter reviews for test practice in the Singapore math series.

Very helpful in keeping child current with math homework.
