The Ultimate Book Of Vehicles: From Around The World

Synopsis

Vehicles, vehicles, vehicles! Nearly 100 of them in all shapes and sizes! A giant crane hovers over a construction site, a space ship roars into space. . . . Supersized spreads feature marvelously detailed illustrations that just beg to be pored over again and again. Best of all, lots of flaps, popups, pull-tabs, and rotating wheels bring the various vehicles to life. Readers will poke into a ship's hold, explore the innards of a garbage truck, and help demolish a house. Any child who's ever been intrigued by the roar of an engine will adore this extraordinary collection of things on the go, from the everyday to the nearly outrageous! yes, there's even a pooper-scooper scooter!

Customer Reviews

"Plenty on display to satisfy the vehicle-obsessed."-Publishers Weekly
"This cheerfully-illustrated, oversized book, with its sturdy flaps, popups, pull-tabs and wheels is just too much fun!"--Redbook Magazine's Mamarama Blog

Anne-Sophie Baumann studied science and literature before becoming an editor and author. She lives near Paris, France. Didier Balicevic studied at École des Arts Décoratifs in Strasbourg.

He lives near Paris, where he works in publishing.

This was one of the priciest books I have bought for my two year old thus far but SO WORTH IT! I, myself, find it intriguing and fun to read! His little heart bursts for all things vehicular and this is just hands down the best book depicting them. I bought it for him to look at after a surgery and it literally brightened his little face and mood. You know that is priceless. Get this book for your child and watch them explore the moving pieces and learn about vehicles from other countries while also watching their love for books develop before your eyes. I do recommend you watch curious little ones with the moving pieces as some of ours have already succumbed to my child. Haha I expected that though and if you keep the pieces some are easily fixable with tape.

Fabulous book. The book is filled with tabs to pull, wheels to turn, flaps to lift up and on and on...on every page. The book covers all kinds of vehicles...RV's, construction vehicles, transportation vehicles, boats, planes, space ships and so much more. My three year old grandson asks to have it read all the time and loves being able to interact with everything on each page. Heck...I love interacting with the vehicles too! It is colorful, with sturdy stock paper and given that the book has been used to flip doors open on buses and RV's, to turn wheels and cement mixer barrels, to move levers, to launch a spaceship into the sky, (to mention merely a few things)...nothing has ripped after many months. I did go through the book first and "opened" all of the moveable items on each page so that when we read the book together...everything was functioning and i knew how to guide my grandson in doing it himself. I highly recommend this book for the little ones in your life!

My 2.5 yr old loves vehicles of all kinds. He also loves books so this was a no brainer. Pros: 1) there are TONS of vehicles! 2) it's interactive. There are flaps and moving parts etc. 2) TONS of vehicles of all kinds Cons: 1) not for young children to use by themselves. My 2.5 yr old isn't destructive when it comes to books. But he broke off a piece of this within 5 mins with just normal toddler use and I was right there. So, this is a supervised only book until he's older. Just a warning if you have younger vehicle lovers. Still a good book that will give you hours of fun reading, discussing, and interacting.

Great book for 5 years and over who loves vehicles. It had a four year old and three year old on grandpa's lap for a solid 20 minutes. There are many flaps to see inner workings, products, people and four or five maybe more interesting things to manipulate which unfortunately later our four year

old had gotten ahold of the book and ripped off parts to two of the harder to manage manipulators. I felt bad as I had meant to make sure that did not happen but let it go as it is just a book...but on the first day before mom and dad had even seen it. I wish I had held it back another year.

I can't believe how reasonably priced this book is! We got it as a gift and 2 yo & 8 year old both love it! The 2 year old has broken some of the flaps but there's so many that my 8 year old is still satisfied w/ using it. It has an amazing # of interesting movable parts. We just bought several of them as gifts to other boys for the holidays because I'm sure they'll love it too!

boys really loved this book. It has already become a favorite! Younger kids who get too exuberant can tear the pull out features but it remains a great book even with a few pieces missing. I bought the 4-year-old his own and they keep it up until he wants to interact with it and little brother is busy with something else.

This book is amazing for anyone with a small vehicle enthusiast in their home! Our 2 year old son LOVES it. It shows the inner-workings of a lot of the vehicles, as well as how they're used. The page on farm machinery was quite an education for myself! Because of the somewhat fragile parts, we make sure we keep it out of his reach and only use it when we're with him. Trying to keep it in one piece as long as we can. Buying one for a friend with a little boy as well. Highly recommend!

I have to say that this is the Best Book on the Planet! We are so happy we found something so smart and creative for fast developing kuds! My baby is 2 years old, he spends 30-40 min a day just to play with it! Great job! Thanks so much from staying at home mom!
