Exposure Analysis

Synopsis

Written by experts, *Exposure Analysis* is the first complete resource in the emerging scientific discipline of exposure analysis. A comprehensive source on the environmental pollutants that affect human health, the book discusses human exposure through pathways including air, food, water, dermal absorption, and, for children, non-food ingestion. The book summarizes existing definitions of exposure, dose, and related concepts and provides the mathematical framework at the heart of these conceptual definitions. Using secondhand smoke as an example, the book illustrates how exposure analysis studies can change human behavior and improve public health. An extensive section on air pollutants considers volatile organic compounds (VOCs), carbon monoxide (CO), fine and ultrafine particles, and the latest personal air quality monitors for measuring individual exposure. Another detailed section examines exposures to pesticides, metals such as lead, and dioxin that may occur through multiple routes such as air, food, and dust ingestion. The book explores important aspects of dermal exposure such as the absorption of volatile organic compounds while showering or bathing and exposure through multiple carrier media. The authors describe quantitative methods that have been validated for predicting the concentrations in enclosed everyday locations, such as automobiles and rooms of the home. They also discuss existing laws and examine the relationship between exposure and national policies. Defining the new field of exposure analysis, this book provides the basic tools needed to identify sources, understand causes, measure exposures, and develop strategies for improving public health.

Book Information

Hardcover: 533 pages

Publisher: CRC Press; 1 edition (October 26, 2006)

Language: English

ISBN-10: 1566706637

ISBN-13: 978-1566706636

Product Dimensions: 10.3 x 7.2 x 1.3 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 3 customer reviews

Best Sellers Rank: #640,725 in Books (See Top 100 in Books) #74 in [Books > Textbooks >](#)

[Medicine & Health Sciences > Medicine > Basic Sciences > Toxicology](#) #135 in [Books >](#)

[Medical Books > Pharmacology > Toxicology](#) #829 in [Books > Textbooks > Medicine & Health Sciences > Administration & Policy > Public Health](#)

Customer Reviews

This book is the required text for a toxicology course I am currently doing. It breaks the material down really well and gives a great background into the intricate nuances of toxicology.

speedy and correct order fulfillment

informative. but requires P.H background.
