Readings In Planning Theory

Synopsis

Featuring updates and revisions to reflect rapid changes in an increasingly globalized world, *Readings in Planning Theory* remains the definitive resource for the latest theoretical and practical debates within the field of planning theory. Represents the newest edition of the leading text in planning theory that brings together the essential classic and cutting-edge readings. Features 20 completely new readings (out of 28 total) for the fourth edition. Introduces and defines key debates in planning theory with editorial materials and readings selected both for their accessibility and importance. Systematically captures the breadth and diversity of planning theory and puts issues into wider social and political contexts without assuming prior knowledge of the field.

Customer Reviews

This 4th edition is the best-available compendium and analysis of planning theory. Remarkably, the editors manage to retain many of the foundational readings while also producing a volume that is overwhelmingly grounded in new scholarship. This expands the canon to show how theory can be inspired and produced by practitioners and scholars engaged with far more than the United States and Europe. — Lawrence J. Vale, Massachusetts Institute of Technology

The current edition of *Readings in Planning Theory* follows in the now well established tradition of its predecessors, in deftly combining incisive editorial commentary with classic writings and contemporary thinking stimulated by the enormous challenges facing societies across the globe. It remains the definitive text in the field. — Heather Campbell, University of Sheffield
