Netter's Histology Flash Cards, Updated Edition

Synopsis

Take your understanding of histology one step further with Netter's Histology Flash Cards. Specially designed to help you master what you need to know, these 200 flash cards are designed to reinforce your understanding of how the human body works in health as well as illness and injury. Classic anatomy illustrations from medical illustrator Frank H. Netter, MD provide strong visual aids and memorable diagrams to facilitate learning. Extensive additional images, including light and electron micrographs, provide an even more comprehensive study experience. Review salient microscopic features of cells, tissues, and organs of the body thanks to beautiful Netter illustrations and histology slides. Study basic biological and histological principles as well as the clinical relevance of histological structure and function through concise textual summaries. Recognize and interpret microscopic sections quickly thanks to an at-a-glance organization. Master the histology knowledge you need to know by using these flash cards in conjunction with Netter's Essential Histology, 2nd Edition, also by Drs. Ovalle and Nahirney. They're completely cross referenced to the Netter's Essential Histology text so it's easy to find more in-depth information on any topic.

Book Information

Cards

Publisher: Saunders; 1st edition (August 28, 2013)

Language: English

ISBN-10: 1455776564

ISBN-13: 978-1455776566

Product Dimensions: 4.5 x 2.7 x 6.6 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 11 customer reviews

Best Sellers Rank: #448,512 in Books (See Top 100 in Books) #38 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Histology #64 in Books > Medical Books > Basic Sciences > Histology #352 in Books > Textbooks > Medicine & Health Sciences > Medicine > Education & Training

Customer Reviews

"This is a valuable study aid in histology, particularly in preparation for board review. The explanatory text is succinct, and the visual identification and clinical relevance of topics are emphasized. The quality of illustrations is exceptional and the combination of gross anatomic views with microscopic images presents histology in the context of gross anatomy, which helps students

understand the correlation of structure and function. In the modern learning environment that employs problem-based and integrated curricula for medical and dental students, clinical information is highly valuable. To enhance the value of the flashcards even more, the names of the cells, tissues, structures or organs could be moved from the front to the back of the card. Currently, users do not have to identify what is presented on a card, unless they make a special effort to cover the top of a card. In addition, the number of microscopic images could be increased to replace some of the Netter's illustrations."-Joanna Goral, PhD(Midwestern Universty) Doody Review: 77/100

Exactly what I needed! While nothing replaces a textbook and talented professor, this is a great way to test your knowledge while out and about or waiting somewhere. Repetition is key for memorization. For my medical school class, the knowledge/explanation on the cards regarding each structure is sufficient.

Perfect for the med student, high yield images

These laminated cards made a big difference in my histology preparation. They are informative, thorough and the pictures help to get a good grasp of important structures. Since they are portable, they are easy to carry to the library or a coffee shop. I recommend these cards to anyone who wants to enhance their preparations in histology.

Excellent

Awesome flash cards, love the fact it comes with a ring so it will be easy to maneuver when studying :)

These cards helped a lot for histology practical. I would recommend these flash cards for any level histology course.

These are very portable and easy to use. I would buy this product again. Totally worth the price. I plan on buying additional similar products.

I did not want info on tissue to look at, I wanted information on histotechnology? Not sure how these popped up?
