# Fundamentals Of General, Organic, And Biological Chemistry (7th Edition)

## Synopsis

Fundamentals of General, Organic, and Biological Chemistry by McMurry, Ballantine, Hoeger, and Peterson provides background in chemistry and biochemistry with a relatable context to ensure students of all disciplines gain an appreciation of chemistry's significance in everyday life. Known for its clarity and concise presentation, this book balances chemical concepts with examples, drawn from students' everyday lives and experiences, to explain the quantitative aspects of chemistry and provide deeper insight into theoretical principles. The Seventh Edition focuses on making connections between General, Organic, and Biological Chemistry through a number of new and updated features including all-new Mastering Reactions boxes, Chemistry in Action boxes, new and revised chapter problems that strengthen the ties between major concepts in each chapter, practical applications, and much more.   
NOTE: this is just the standalone book, if you want the book/access card order the ISBN below: 032175011X / 9780321750112  
Fundamentals of General, Organic, and Biological Chemistry Plus MasteringChemistry with eText -- Access Card Package   
Package consists of: 0321750837 / 9780321750839  
Fundamentals of General, Organic, and Biological Chemistry 0321776461 / 9780321776464  
MasteringChemistry with Pearson eText -- Valuepack Access Card -- for Fundamentals of General, Organic, and Biological Chemistry

## Book Information

Hardcover: 992 pages

Publisher: Pearson; 7 edition (January 12, 2012)

Language: English

ISBN-10: 0321750837

ISBN-13: 978-0321750839

Product Dimensions: 8.8 x 1.4 x 11 inches

Shipping Weight: 4.8 pounds

Average Customer Review: 4.1 out of 5 stars 84 customer reviews

Best Sellers Rank: #9,864 in Books (See Top 100 in Books) #9 in Books > Education & Teaching > Schools & Teaching > Instruction Methods > Science & Technology #67 in Books > Books > Science & Math > Chemistry > General & Reference #89 in Books > Textbooks > Science & Mathematics > Chemistry

## Customer Reviews

John McMurry, educated at Harvard and Columbia, has taught approximately 17,000 students in

general and organic chemistry over a 30-year period. A Professor of Chemistry at Cornell University since 1980, Dr. McMurry previously spent 13 years on the faculty at the University of California at Santa Cruz. He has received numerous awards, including the Alfred P. Sloan Fellowship (1969-71), the National Institute of Health Career Development Award (1975-80), the Alexander von Humboldt Senior Scientist Award (1986-87), and the Max Planck Research Award (1991). David S. Ballantine received his B.S. in Chemistry in 1977 from the College of William and Mary in Williamsburg, VA, and his Ph.D. in Chemistry in 1983 from the University of Maryland at College Park. After several years as a researcher at the Naval Research Labs in Washington, DC, he joined the faculty in the Department of Chemistry and Biochemistry of Northern Illinois University, where he has been a professor since 1989. He was awarded the Excellence in Undergraduate Teaching Award in 1998 and has been departmental Director of Undergraduate Studies since 2008. In addition, he is the coordinator for the Introductory and General Chemistry programs, and is responsible for supervision of the laboratory teaching assistants. Carl A. Hoeger received his B.S. in Chemistry from San Diego State University and his Ph.D. in Organic Chemistry from the University of Wisconsin, Madison in 1983. After a postdoctoral stint at the University of California, Riverside, he joined the Peptide Biology Laboratory at the Salk Institute in 1985 where he ran the NIH Peptide Facility while doing basic research in the development of peptide agonists and antagonists. During this time he also taught general, organic, and biochemistry at San Diego City College, Palomar College, and Miramar College. He joined the teaching faculty at University of California, San Diego in 1998. Dr. Hoeger has been teaching chemistry to undergraduates for over 20 years, where he continues to explore the use of technology in the classroom; his current project involves the use of video podcasts as adjuncts to live lectures. In 2004 he won the Paul and Barbara Saltman Distinguished Teaching Award from UCSD. He is deeply involved with the General Chemistry program at UCSD, and also shares partial responsibility for the training and guidance of teaching assistants in the Chemistry and Biochemistry departments. Virginia E. Peterson received her B.S. in Chemistry in 1967 from the University of Washington in Seattle, and her Ph.D. in Biochemistry in 1980 from the University of Maryland at College Park. Between her undergraduate and graduate years she worked in lipid, diabetes, and heart disease research at Stanford University. Following her Ph.D. she took a position in the Biochemistry Department at the University of Missouri in Columbia and is now Professor Emerita. When she retired in 2011 she had been the Director of Undergraduate Advising for the department for 8 years and had taught both senior capstone classes and biochemistry classes for nonscience majors. Although retired Dr. Peterson continues to advise undergraduates and teach classes. Awards include both the college level and the

university-wide Excellence in Teaching Award and, in 2006, the Universityâ™s Outstanding Advisor Award and the State of Missouri Outstanding University Advisor Award. Dr. Peterson believes in public service and in 2003 received the Silver Beaver Award for service from the Boy Scouts of America.

This is a great book! It gives example problems and really walks you through it simple and clear every step. It shows you how to use your common sense and intuition to help derive answers. The rules of chemistry are laid out in a clear and simple way. The pictures are great, and this is a great book for anyone going into the health field in the future because it has lots of stuff about health and how chemistry is related to the medical field. It's just an easy read when it comes to chemistry books. This is a non-science major chemistry book, I took that course as a refresher and I am now taking the science major chemistry and I can tell you that this book has less to read than the science major chemistry book so don't complain. :) Anyway, learn chemistry, read this book! Oh, and it is imperative that you work the problems out of the back of each chapter. You must do this to learn it and retain it. Believe me, I am speaking from experience. Solving problems pays. If you want to crush your exam, work and solve all the problems you can. Best of luck!

**DOES NOT COME WITH MASTERING CHEMISTRY ACCESS CODE.** I ordered loose leaf, and I got hardcover. Good thing I only paid \$33, expecting loose leaf. However, on the paper that came inside the package, the book should have costed 25, and I paid 33 (not including shipping), and I expected an access code. Book is in good condition, with clean pages, and no strange smell. All in all, it's an OK purchase. You don't get what was stated, though, which is a bit annoying.

This book is full of errors. Some of the answers in the back of the book are plain wrong. If you have to buy it for a class, double check anything that sounds funny to you. If it's not required, don't buy it. If it is required, sell it back because it's not a very good reference.

good

Book missing some practice pages in some chapters, book was held together with tape. No highlights inside book. It was a good price, fast shipping.

I've used this book for General chemistry and Biochemistry, and I love it!! It's very helpful, makes it

easy to understand! Mine arrived in very good shape!

Does not come with the access code for the online Mastering Chemistry.

You always have the books i need at an affordable price. I receive them in a timely manner and am always given adequate time before they have to be returned. The return of the books is also very easy. I always recommend you to everyone.
