Customer Reviews

Eric Braun has written more than one hundred books for kids and teens, including many about sports. He coaches youth baseball and soccer, has two sports-loving sons, and has suffered many disappointments as a lifelong fan of the Minnesota Twins. Robin Boyden works as an Illustrator, writer and designer and is based in Bristol, England. He has a first class BA honors in Illustration from the University of Falmouth and an MA in Art and Design from the University Of Hertfordshire. He has worked with a number of clients in the editorial and publishing sectors including Bloomsbury Publishing, The Phoenix Comic, BBC, The Guardian, The Times, Oxford University Press and Usborne Publishing.

What a fun story to introduce the topic of matter to children. The students in my special ed class loved it and keep wanting to go back and look at it over and over again.

This is a great story for introducing states of matter to children. My second grade students loved the mix of fantasy and nonfiction!

The students in my classroom can't get enough of this book. It is off the shelf as soon as it is returned. They enjoy reading it and I enjoyed reading it to them. The product arrived in excellent condition! Thanks!

This was a great book. My students loved it. Worked with my science lesson great. made it interesting. Thank you!

Entertaining and informative picture book about the different forms of matter. This is a perfect book to read with elementary age students as additional science curriculum or just for fun.
