Customer Reviews

The Rogue Hypnotist is a font of information. Some of it is may not be completely trustworthy, like
 his statement that you can say something into a recorder and play it backwards to hear messages
 from your unconscious mind (that's more likely your mind finding patterns where there are none),
 but much of it truly is treasure. You have to pick out which is which, but it's time and money well
 spent. I'm a formally trained consulting hypnotist and I constantly read books, watch training videos,

listen to podcasts and talk shop whenever I meet another hypnotist, but I have to say I've gotten just as much out of Rogue's inexpensive eBooks as I have expensive training courses. The down side is that the books desperately need an editor--someone to correct spelling and especially punctuation. His scripts are less useful to me per se, but I pull out ideas and phrases to incorporate into my "utility phrases." His organization is pretty random, but if you're fishing for tidbits, there's plenty here. Rogue is opinionated and that bleeds through all the time. But I'm okay with that because he's not trying to hide the fact that it's opinion. I don't know how much good this book will do you if you don't have some kind of hypnosis background. It suffers from a lack of structure and sequence. It makes up for it over and over with little segments of advice and ideas that are gold. Keep a notebook at hand and be ready to take notes.

Excellent book for novices and experienced hypnotists alike. The Rogue Hypnotist, (who is that masked man, anyway?), covers a variety of important topics, cutting through the fat to the heart of the matter, all the while cultivating the highest ethics in his/her padawans. You could confuse yourself with long treatises full of double talk and blather, or you could read the Rogue Hypnotist. Looking forward to the next installment.

Love these books, bought one through Kendle and was a refreshing read, all the books are straight to the point with out some long drawn out B.S. on Hypnosis like every other writer does. It's not based in being mysticism much like the crap that's out there. I do have to admit the covers are a little corny and I questioned my first purchase, I am glad I just did it well worth it

The easiest down to earth instructional book around. Easy to read, understand with no fluff and to the point books I have ever read! I have read many many books on hypnosis and these are the best...

Helped me understand a lot more about hypnosis.

Excellent, no nonsense information. Exact scripts this information is much better than other texts I have read on the subject.

I love all the books in this series that I have. It provides scripts that go way beyond what a person is taught in an online class. He/she is truly an agent of change, cutting out all the BS and getting you

to understand how the brain works.

Crap! bad Purchase
