Unicorns Are Jerks: A Coloring Book Exposing The Cold, Hard, Sparkly Truth

Synopsis

Unicorns think they're so great because they're all mysterious and magical, but they can be real jerks sometimes. This coloring book features eighteen examples of unicorns texting in theaters, farting in elevators, eating your leftovers, and generally acting like jerks. Theo Nicole's Lorenz's humorous, offbeat coloring books are perfect for anyone looking to break outside the world of patterns and mandalas, and add some laughter along the way!

Book Information

Paperback: 48 pages

Publisher: Sourcebooks; Clr Csm edition (June 1, 2016)

Customer Reviews

"Coloring books for adults are still hot, but you haven't seen one like Unicorns are Jerks. This book is what an adult coloring book should be...irreverent and fun" - San Francisco Book Review

This coloring book saved my business. Our firm was on the verge of hiring a unicorn as our new public relations rep. At first, it seemed like a dream come true, what with his magical rainbow mane and shimmering eyes but then after reading this book, we decided to do a little more digging on our potential new hire. I'm so glad we did! This guy turned out to be a notorious ringleader in a human trafficking scandal! Bad news folks! He was using his irresistible horn to lure young children away into a life of depravity and abuse! We owe everything to this important publication. It's really so much more than a coloring book, it's a public service announcement. Don't trust unicorns! Period!! think it's about time these menaces to society are revealed for who they really are!

This coloring book is HILLARIOUS!!! I got this as a gift to send to my best friend who was in the

hospital. She and I both have very rare illnesses so doctors usually call us "unicorns". When I saw this I knew I had to send it to her as the perfect inside joke! She's 23 and absolutely LOVES this book. Coloring has always been very relaxing, a great distraction, and the perfect time killer for children, and now adults can get in on the fun and benefits! I'd definitely recommend this book for adults or young adults who want to destress! It was shipped and delivered very quickly with no issues! I'll be back for more!

Fun for all! I'm a child at heart and I enjoy coloring, this is a great alternative to kids coloring books I've pretty much colored all the pages already!

This has to be my FAVORITE coloring book EVER!!! The images are simple and fun to color. This is definitely not an advanced coloring book and that's fine. It's cute and funny. The quality of her images are nice and the thickness of the paper is great for gel pens. The pages are single sided, so if you decide to use Sharpies then I suggest you place something behind each page.

Love this coloring book. Each page has one drawing, nothing on the back. I colored using markers, and simply put a piece of copy paper behind the page I was working on so it wouldn't bleed through to the next page. Love each page. And you can easily replace Unicorns with Teenagers :).

Funny book. Who wouldn't love these jerky unicorns? Single sided images (blank backs). Entertaining to see and a little bit fun coloring. The drawings are simple and perhaps childish. But who says you have to grow up?

This is really great. I was sort of getting tired of the really meticulous adult coloring books so this book having like open pictures to color was a nice change. The story line are pretty funny as well. I love coloring in these while i'm bored at work to pass time (im just a receptionist, I don't do much) or I color in them while watching netflix I loveeeee coloring while watching netflix. It's just a nice calming, mindless activity that allows you to still focus on what your watching as well and keeping your hands busy. The pages are thinner than other books I've had, but I have not noticed an issue with bleeding through when using markers. Which brings me to my next point, one thing I do recommend with this book is using colored pencils. Maybe that is normal for some of you colorers but in previous books using markers never resulted in an issue because the coloring spaces were so small that the marker lines didn't show. When I first used this book I went in with marker not

thinking of it and didn't like that I could see the marker streaks. and if the markers streaks overlapped it would get darker. So I'm sure that colored pencils will fix that issue. It's not at fault of the coloring book, just an observation I found. Overall, I would highly recommend this coloring book.

This coloring book is so full of truths that my child needs to learn. Unicorns are a-holes and the sooner he knows that the better he will have a chance at life. Sure there was crying "mom, but unicorns are magical and blah blah BLAH". No kid, they are not. If by magical you mean - will be real nice to your face and then jump you with a shiv in the alley. I couldn't be happier that there is a fun medium of coloring to bring a fantasy world of happy rainbow farting unicorns crashing down.
