ABC Animals!: A Scanimation Picture Book (Scanimation Picture Books)

Synopsis

***A 2016 National Parenting Product Awards (NAPPA) winner The timeless appeal of alphabet books meets the richest Scanimation book ever. ABC Animals is a romping, stomping journey from A to Z, and all the animals come aliveâ "as many as four to a pageâ "in the excitement of Scanimation. Itâ "TM"s the alphabet as itâ "TM"s never been seen before: Watch the Alligator snap, the Bats swooping, the Camel trot. Thereâ "TM"s L for the Lion proudly prowling along, and M for the Mouse scurrying inside his wheel. And it all culminates in the largest Scanimation image yet: Z, for Zoo, where all the animals gather to play.

Rufus Butler Seder is the author of Gallop! and other Scanimation titles with over 6.3 million copies in print. An author, artist, filmmaker, and inventor, his first significant invention was Lifetiles, glass-walled murals that appear to come to life when the viewer walks by. Heâ "TM"s installed them at the Smithsonian, SeaWorld, Union Station, and other museums, aquariums, train stations, and ocean liners around the world.

We have the waddle book and this book as well. The kids love the scimations. When we bought this book we were hoping for more text and some of the fun that the waddle book has. This is simply a letter book though with no real text. The left pages have the letters in large print (4 letters per

page) and the right page has the scimations with an animal name underneath (1 for each letter, 4 per page). Pros: 1. Scimations! The kids love them 2. Sturdy! Although not quite a board book this book as well as the waddle book (which we've had for over a year) hold up well. Sometimes we find special books (flip books and others) tear easily. We haven't had any issues with these. 3. Educational! Who doesn't love a letter book. Cons: 1. Was hoping for more than just a picture with a word.

Just pulled this book and "Waddle!: A Scimation picture book" out of the packing box. I was so excited about these books I wanted to check them out before wrapping them for Christmas. The "Waddle!..." book is gorgeous so I was expecting the same quality with the "ABC ANIMALS!..." book. I'm quite disappointed with this book, I have to say! The pictures are not clear at all! So I played around with it and noticed the cardboard pages that hold the pictures in are not snug together creating a "bubble" in the films. These are for a two yr old and I can see this book will be tossed to the corner right away. I think this is just a fluke flaw seeing as I read so many great reviews on these books!

This book is a great idea. The animals are hard to see though. My 3 year old nephew liked it for about 20 seconds and moved on, if that tells you any thing. I think the ones with the bigger pics would be better and easier to see,

Our granddaughter just loves this book as well as the Safari photicular book - the movements of the animals are so very intriguing to her.

Such a neat book to flip through, even for grown ups.

Fantastic and well made book that is a hit with not only the kids but adults as well!!! Made great gifts and are books we will enjoy for many years, as it is a sturdy and hardcover book. Very realistic and fun!!!

Love these books! So ingenious! Book came warped a little so the scimation did not work so well :(

Plastic film for pictures doesn't lay flat so pictures ended up being too dark to see the movement. Very disappointed.
