My Book Of Number Games, 1-150 (Kumon Workbooks)

Synopsis

My Book of Number Games 1-150 is in the 'Math Skills Workbooks for Pre-K' series that covers ages 4-6. Perfect for children who can recognise and recite numbers from 1 to 150, use this workbook to help children to further develop their counting abilities. Exercises include drawing a line from one point to another in numerical order while saying each number out loud, as well as matching each number and coloring in the blank spaces.

Age Range: 4 - 6 years

Grade Level: Preschool - 1

Customer Reviews

Kumon workbooks are based on the "Kumon Method", an educational philosophy that aims at unlocking the full learning potential of each individual child. The Kumon Method introduces learning concepts in an incremental, step-by-step approach, allowing children to master new skills easily and without anxiety or frustration. As a result, children gain confidence in their abilities and are motivated to learn on their own. Over 3.5 million children around the world use the Kumon Method to develop their math and reading skills. Kumon Math and Reading Centers help students become successful, confident and self-motivated learners. But it's not just the Kumon Method that makes our workbooks special. It's also the care and research that goes into the editorial content, design and quality of the books. Our editorial experts have more than two decades of experience in

producing books that are both fun and educational. Our designers create illustrations that attract and delight children. And the quality of our books is the best of any workbook on the market, with extra thick paper and the best available print quality. From pedagogy to paper, every one of our workbooks has been carefully crafted with your child's best interests in mind.

Absolutely love this product. My four year old son was having difficulty counting past 50 but once he started working in this book he was able to count to 150 in no time at all. He loved this book and completed several pages each day. This was our introduction to Kumon which we enjoyed so much that I bought several other Kumon books.

My 3 y/o loves all the kumon books and this one is no exception. She's learning how to count and the games, though somewhat challenging for her are fun.

I could have just printed out dot to dot pages for my daughter, I thought this would be more diverse. Not worth the extra money.

I love to use these Kumon workbooks with my First Graders. They love them too. Each page has two sides. One side is a challenging connect the dot with great images. The connect the dots are great for developing numeracy skills. Usually connect the dots are so obvious that it doesn't really challenge the kids' numeracy skills but not with these. They really have to think about which number comes next since they don't usually know what the picture is. It is also really useful for developing fine motor skills. The back of the page is a picture that is revealed by the children coloring numbered boxes with a particular color. In other words they will color all the 71's violet-blue, all the 73's midnight blue. As the color a picture emerges. The kids are always thrilled to tell me what the picture is. As you can imagine, these coloring activities are great for teaching numbers and colors.

I should have started with 1-70, but went straight to this one because my son is 5. I think I overwhelmed him and he got bored after a while. The series is great, but my recommendation is to start at the beginning and build up.

Wish I started my daughter with Kumon when she was younger. She is 7 now and loves these books. My son who is 4 also loves his Kumon workbooks. Thank you!

This was not one of our favorite Kumon workbooks. It consists of dot to dots and color by numbers. That's pretty much it. If your child likes that, then this is the book for you. It does teach number order well through repetition.

Son used this over summer and Kumon books are amazing! Engaging and our son loved them!!
