Customer Reviews

This book is awesome! It's great for a beginner like me to break up the monotony of teach yourself guitar books/DVDs by learning a few of my favorite Metallica riffs. Some are more difficult than others, but there's something in here for everyone. So far, everything I've learned has been dead on accurate and most importantly fun. There is also some early Metallica history and added commentary/explanations which are cool. Keep in mind that these are just the major riffs, not the entire songs. If you're a more advanced player, cherry lane also offers full album tab books that are great. For a beginner or intermediate player, this is perfect to have some fun and jam with.

This book breaks down the intricate, complicated arrangements of Metallica into manageable chunks that are a bit easier to get a handle on. Even so, it's not for novices or those who are just starting out on guitar. Get a good grasp of the basics before you try to tackle the monster that is Metallica!

This is a good collection, really intense both rhythm and lead... now if I can find someone to teach me how to play this, not just the guitar I only know basics, I'm not an Intermediate or Advanced guitarist yet.

You get as much music for each song as they could stuff onto 2 pages per song! Think about that! So a song like "To live is to die", you know they can't fit all onto two pages. But I'd have been satisfied learning the main parts but there is a nasty habit of completely skipping intro riffs! The "Four Horseman" intro is not in this book! That is THE signature riff to that song and it's not there. Along with a lot of other holes. Sorry.

This is a book made up of only partial songs. Was not aware of this at time of purchase. Would definitely return this item if I could.

Book is very thorough and helped me with learning to play the main riffs of their songs. It was everything I had hoped for.

Awsome

I bought this book for my son as he is playing learning to play both the electric and acoustic guitar. He seems to like this book okay but doesn't use it as much as I thought he would. Good deal for the price...
