The oldest and most widely recognized professional organization, the Association of Surgical Technologists represents more than 80,000 surgical technologists. Its primary purpose is to ensure that surgical technologists have the knowledge and skills to administer patient care of the highest quality.

This book is a life time keeper and a life saver. It goes into detailed information that every CST

needs to know for their job in the OR and medical field. It also goes into details of other personnel's job roles so there is no confusion when dealing with a patient during a routine scheduled surgery or an immediate trauma case. Details and pictures of surgical instruments are very helpful. Semi updated laws and regulations chapters are provided. I haven't finished the book yet, as I am still in the process of becoming a CST but am very happy with my educational learning tools so far. FYI anyone interested in this field of work, this book will be the last one issued for this semester. Next year a new text book will be distributed and used nation wide by all credited surgical tech programs.

This book has a good overview of the surgical procedures and lots of things to be aware of as a surgical technologist. However, if you want information on the body systems or why things are done, the last edition provides MUCH more understanding. This book adds information for dealing with the modern threats of bioterrorism, and current procedures for terrorist attacks and modern concerns. Again, if you want good information to pass a surgical technology course all in 1 book, get the 3d edition.

Thank you!

I use this book for my surgi tech class. It's only supplemental but helped tremendously with my summer paper. Plus it is stressed how much of a role the AST has in the curriculum, so it's a great book to have

Helped me with my homework. It wasn't a required book, but I bought it because I noticed some answers coming from this book.

Study this book if you want to pass your CST!!

I am really enjoying this eTextbook! It is well written and I love that I can highlight important information. I also enjoy the fact that I can make flashcards with this version!
